Subject: Duke Energy PV Interconnection Commissioning Process Update- Action Required

Solar Development Community,

Advanced Energy would like to share some new information regarding the Duke Energy PV interconnection commissioning process. This process only applies to distribution-interconnected solar facilities 1 MW or larger in NC and SC Duke Energy territories. Please read the attached FAQ document.

One important item to note:

- To most effectively manage end of year demand, Advanced Energy has revised the current MV audit request system. **Your immediate attention is needed before August 4** to initiate the interconnection commissioning process for all of your projects between now and the end of the year. For instructions on initiating the interconnection commissioning process, see question “**How do I initiate the interconnection commissioning process?**” on page 4 of the attached document.

Feel free to reach out to Advanced Energy at solarcommissioning@advancedenergy.org or by phone (919.857.9009) with any questions or concerns.

Sincerely,
Advanced Energy Solar Team

AE Solar Commissioning
